PROFESSIONAL SUMMARY

Data Science MBA with a B.Tech in Automobile Engineering (All Kerala 2nd Rank) — offering a rare combination of automotive domain knowledge and data analytics expertise. Delivered live analytical systems: a Flowchart Monitoring System (FMS) tracking real-time delivery KPIs via Google Sheets, web-based data entry portals, and a Power BI management dashboard; Excel-based academic performance analytics at Nirmala Institute; and 1,000+ SAP HANA service record analysis at TVS Mobility. Built ML models for EV range prediction and customer churn. Proficient in Python, SQL, Power BI, Tableau, Excel, SAP HANA, and AWS. Seeks a Data Analyst role to convert raw data into actionable operational and business insights.

PROFESSIONAL EXPERIENCE

MIS Executive | Jain Wire Netting Corporation, Angamaly, Kerala *May 2026 – Present*

- Designed and deployed a Field Monitoring System (FMS) end-to-end — three web-based pages for driver data entry, executive confirmation, and MD-level monitoring via a live Power BI dashboard
- Built real-time data entry pipelines using Google Sheets and web portals; applied SQL-based data cleaning to ensure data integrity before dashboard consumption
- Automated multi-step delivery workflows — form submissions trigger structured data entry into Google Sheets, enabling live visibility into delivery pipeline status and KPIs
- Designed Power BI summary dashboards to visualise pending items, completion rates, and escalation flags for senior management reporting
- Eliminated manual tracking errors, improving data accuracy and significantly reducing reporting turnaround time

Lecturer — Automobile Engineering | Nirmala Institute, of Technology , Ernakulam *Jun 2025 – April 2026*

Designed Excel-based analytics dashboards to track student academic performance across batches — enabling faculty-led data-driven decision-making

- Conducted performance trend analysis, identifying knowledge gaps and producing structured reports for academic intervention
- Built automated course documentation system improving data accuracy and processing efficiency

Service Engineer | TVS Mobility Pvt Ltd, Ernakulam *Feb 2024 – Jan 2025*

- Managed and analysed 1,000+ service records in SAP HANA, building proficiency in enterprise automotive data systems
- Monitored SLA performance metrics achieving 95% adherence through consistent analytical tracking
- Led warranty claim data analysis achieving 20% improvement in claim turnaround through process analytics

TRAINING & DEVELOPMENT

Business Development Training | Business Development India (BCI)

Ongoing

- Understanding of business development strategies and market expansion techniques
- Knowledge of lead generation, client acquisition, and relationship management
- Exposure to sales funnel management and conversion optimization
- Learning market research and competitor analysis methods
- Understanding customer lifecycle and value creation strategies
- Basics of negotiation, pitching, and closing business deals
- Insight into revenue models and business growth planning
- Familiarity with CRM tools and business tracking systems
- Development of communication and stakeholder management skills
- Exposure to data-driven decision-making in business operations

KEY PROJECTS

Google Sheets → MySQL → Power BI | End-to-End Data Pipeline Projects

Driver Performance & Operations Dashboard

May 2026

[Google Sheets](#) · [MySQL](#) · [Power BI](#) · [KPI Analytics](#) · [Operational Reporting](#)

- Analyzed operational data using MySQL to clean, transform, and prepare datasets for reporting
- Built an interactive Power BI dashboard to monitor driver performance, task status, and issue trends
- Developed KPI cards (Total Trips, Completed, Pending, Rejected) for real-time performance tracking
- Created visualizations for efficiency analysis, workload distribution, and daily trend monitoring
- Identified bottlenecks and performance gaps using data-driven insights
- Enabled dynamic filtering (driver, status, date) for detailed operational analysis

Trip Analysis & Acceptance Monitoring Dashboard

May 2026

[Google Sheets](#) · [MySQL](#) · [Power BI](#) · [Trip Analytics](#) · [Acceptance Rate Monitoring](#)

- Processed and analyzed trip-level data using MySQL for structured reporting and insights
- Designed a Power BI dashboard to track trip performance, acceptance rate, and mismatch analysis
- Built KPI metrics including Total Trips, Accepted, Rejected, Mismatch Count, and Acceptance Rate
- Developed visuals for driver-wise performance, vehicle utilization, and issue tracking
- Created trend analysis dashboards to monitor daily trip patterns and operational efficiency
- Delivered actionable insights to improve acceptance rates and reduce mismatches

FlowChart Monitoring System (FMS)

May 2026

[Google Sheets](#) · [SQL](#) · [Power BI](#) · [Google Apps Script](#) · [Web Portal Design](#)

- End-to-end system built for Jain Wire Netting Corporation: requirement gathering, web portal design, data pipeline automation, SQL-based data cleaning, and Power BI dashboard delivery
- Developed 3 dedicated web pages — Driver Data Entry portal, Executive Confirmation interface, and MD Monitoring Dashboard — enabling a complete delivery tracking workflow
- Automated data capture from driver entries into Google Sheets; applied SQL data cleaning routines to standardise and validate records before loading into Power BI

- Power BI dashboard provides real-time delivery KPIs including pending items, completion rates, driver status, and escalation flags for senior management oversight

Delegation Management System with Scoring Dashboard

May 2026

[Google Sheets](#) · [Apps Script](#) · [Dashboard Design](#) · [Performance Analytics](#)

- Built a web-enabled delegation management system with an integrated scoring dashboard, leveraging performance data to monitor task execution, analyze team efficiency, and drive data-driven improvements in workflow and productivity

CRM Data Tracking & Analytics System

May 2026

[CRM](#) · [Data Analytics](#) · [Process Optimization](#) · [Revenue Analytics](#)

- Built and optimized a CRM data tracking system, applying analytical techniques to evaluate customer journey metrics, uncover process inefficiencies, and drive data-backed improvements in operations and revenue collection

Purchase Requisition FMS

May 2026

[Google Sheets](#) · [SQL](#) · [Power BI](#) · [Workflow Analytics](#) · [Procurement Data](#)

- Built a data-driven Purchase Requisition FMS to capture and analyze procurement workflow data, enabling performance monitoring, cycle-time reduction, and data-backed decision-making in approval processes

Order-to-Delivery FMS

May 2026

[Google Sheets](#) · [SQL](#) · [Power BI](#) · [Fulfilment Analytics](#) · [Lifecycle Metrics](#)

- Built a data-driven Order-to-Delivery FMS, capturing lifecycle metrics to evaluate performance, optimize fulfilment processes, and enable data-backed decisions for faster and more reliable deliveries

Electric Vehicle Range Prediction & Insights

April 2026

[Python](#) · [Pandas](#) · [Scikit-learn](#) · [Matplotlib](#) · [Machine Learning](#)

- Analysed 10,000+ EV records with EDA, feature importance analysis, and trend visualisation across manufacturers and model years
- Built and evaluated Random Forest and Linear Regression models (MAE, R^2) for predicting EV range; findings presented in stakeholder-ready visual reports

Student Performance Analytics

Jun 2025 – Present

[Excel](#) · [Dashboard Design](#) · [Automation](#) · [Reporting](#)

- Designed and deployed end-to-end Excel analytics system: performance tracking, trend analysis across batches and subjects, automated faculty reporting
- Recognised institutionally for delivering actionable insights that improved academic process efficiency

Customer Churn Prediction

Oct 2025 – Dec 2025

[Python](#) · [KNIME](#) · [Tableau](#) · [Machine Learning](#)

- Full pipeline ML model for churn classification — preprocessing, feature engineering, evaluation (AUC, precision-recall), Tableau visualisation of churn drivers

TECHNICAL SKILLS

Analytics: Python (Pandas, NumPy), SQL, MySQL, Google Sheets (Advanced), MS Excel (Advanced)

Visualisation: Power BI, Tableau, Matplotlib, Dashboard Design, Reporting

ML & Tools: Scikit-learn, KNIME, Orange, Machine Learning

Cloud & DB: SAP HANA, MySQL, AWS, Google Workspace, Apps Script

Automotive: Vehicle Diagnostics, OBD, Service Analytics, Warranty Data, CATIA V5

Soft Skills: Analytical Reporting, Technical Documentation, Malayalam, English, Hindi

EDUCATION

MBA — Data Science & Analytics | JAIN (Deemed-to-be University), Bangalore

Jan 2024 – Jan 2026 | CGPA: 9.0

B.Tech — Automobile Engineering | SCMS School of Engineering and Technology, Ernakulam

June 2019 – June 2023 | CGPA: 8.4 | All Kerala 2nd Rank — APJ Abdul Kalam University (2023)

CERTIFICATIONS & ACHIEVEMENTS

- All Kerala 2nd Rank — B.Tech Automobile Engineering, APJ Abdul Kalam University (2023)
- Career Essentials in Business Analytics — Microsoft (2025)
- Career Essentials in Generative AI — Microsoft (2025)
- Programming with Python — OpenEDG Python Institute (2025)
- Data Science — KNIME (2025)
- Career Essentials in Project Management — Microsoft (2025)
- Generative AI for Learning and Development — LinkedIn Learning (2025)
