

BHARATH V KUMAR

Business Systems Analyst | Business Analyst | Data Analyst

8589907019 | bharathvkumar333@gmail.com | Kodungallur, Thrissur, Kerala, India | linkedin.com/in/bharath-v-kumar-91115a200 | bharathvkumar-pm.github.io

PROFESSIONAL SUMMARY

Results-driven analyst with an MBA in Data Science & Analytics (9.0 CGPA) and hands-on experience designing business systems, workflow automation, and reporting dashboards for manufacturing and operations teams. Skilled in requirements gathering, process mapping, SQL, Power BI, Google Data Studio, and Google Apps Script, with a track record of building 40+ operational tracking systems (FMS, CRM, checklist, and dashboard tools) that improved data visibility and reduced manual follow-up. Applies Generative AI and custom AI tooling to speed up data analysis and reporting. Seeking a Business Systems Analyst, Business Analyst, or Data Analyst role.

CORE SKILLS

Requirements Gathering & Process Mapping • Business & Data Analysis • Stakeholder Management • SQL & MySQL • Power BI & Google Data Studio • Google Apps Script (JavaScript) • Google Sheets / Excel (Advanced Formulas, Automation) • Workflow & FMS Design • Data Cleaning & Reporting • Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) • Machine Learning Fundamentals • Generative AI for Data Analysis • Custom AI Tool & Gemini Gem Development • Root-Cause & Gap Analysis

PROFESSIONAL EXPERIENCE

MIS Executive | Jain Wire Netting Corporation, Angamaly, Kerala *Present*

- Design and maintain 40+ Google Sheets/Apps Script business systems (FMS, CRM trackers, delegation tools, and compliance checklists) used across Operations, Purchase, Logistics, HR, and Warehouse teams.
- Gather requirements directly from department heads and floor supervisors, translating manual/paper-based processes into structured digital workflows with validations and conditional-formatting alerts.
- Built a Production Monitoring Sheet (PMS) tracking planned vs. actual output by shift, enabling near real-time visibility for the MD and production coordinators.
- Developed dashboards (Delivery Monitoring, Driver Panel, Executive Panel, Inventory Strategy Explorer) using Power BI and Google Data Studio to convert raw operational data into actionable KPIs for leadership.
- Automated recurring follow-up loops (payment collection, purchase requisition, material return) using time-based reminder logic, reducing manual tracking effort.
- Built custom Gemini Gems (AI tools), including an Auto-Pilot mode with tailored skill settings, to accelerate JD creation and Gen-AI-assisted data analysis.

Lecturer | Nirmala Institute of Technology *Jun 2025 – Apr 2026*

- Delivered technical coursework and mentored students, strengthening structured communication and analytical explanation skills later applied to stakeholder reporting.

Service Engineer | TVS Mobility *Feb 2024 – May 2025*

- Diagnosed and resolved technical issues in the field, building a strong foundation in root-cause analysis and process troubleshooting.

KEY PROJECTS & SYSTEMS BUILT

- Flow Management Systems (FMS): Designed 10+ FMS trackers spanning CRM, Purchase Requisition, Order-to-Delivery, Order Return, Daily Invoice Resolvment, Material Return, and Machine Spare Requisition processes.
- Delegation & Task Management: Built Delegation Sheets and Task Assignment systems for two branch locations (Edappally and Angamaly) to track ownership and turnaround of assigned tasks.
- Checklist & Compliance Systems: Digitized 10+ supervisor and department checklists (BB1/BB2 Supervisor, Warehouse Daily, Vehicle Dispatch, Office Morning Checklist, and unit-level checklists) with linked Google Forms for field data capture.
- Dashboards & Registers: Built Inventory Strategy Explorer, Ultimate IMS, System Master, Master Stock Register, and Invoice Tracker to centralize stock, inventory, and invoice data for faster decision-making; built PC, Doer, and MD Checklist Dashboards in Google Data Studio, and the BB1 Production List with a companion Web App (Google Apps Script) for shop-floor data entry.

- Analytics Coursework Projects: EV range, customer churn, and student performance prediction using Python, Matplotlib, and Seaborn.

EDUCATION

MBA – Data Science & Analytics | JAIN University | CGPA: 9.02024 – 2026

B.Tech – Automobile Engineering | SCMS School of Engineering and Technology | CGPA: 8.42019 – 2023
